ELSEVIER

Journal of Statistical Planning and Inference 61 (1997) 385

journal of statistical planning and inference

Author Index Volume 61 (1997)*

Akritas, M.G. and E. Brunner, A unified approach to rank tests for mixed models (2) 249–277
Alvo, M. and J. Pan, A general theory of hypothesis testing based on rankings (2) 219–248
Barakat, H.M., Asymptotic properties of bivariate random extremes (2) 203–217
Bhat, U.N., *see* G.K. Miller (2) 355–372
Brunner, E., *see* M.G. Akritas (2) 249–277
Czado, C., On selecting parametric link transformation families in generalized linear models (1) 125–139
del Río, A.Q., Nonparametric estimation of density derivatives of dependent data (1) 155–174
He, K. and G. Meeden, Selecting the number of bins in a histogram: A decision theoretic approach (1) 49– 59
Hebbar, H.V., *see* K.G. Janardan (2) 193–201
Iwashita, T., Asymptotic null and nonnull distribution of Hotelling's T^2-statistics under the elliptical distribution (1) 85–104
Janardan, K.G., N.R. Mohan, R. Vasudeva and H.V. Hebbar, A stochastic model with random change point for the study of oviposition tactics of weevils on beans (2) 193–201
Lahiri, S.N., Variance stabilizing transformations, studentization and the bootstrap (1) 105–123
Liang, T., Simultaneously selecting normal populations close to a control (2) 297–316
Lindley, D.V., Some comments of Bayes factors (1) 181–189
Macula, A.J., A nonadaptive version of Ulam's problem with one lie (1) 175–180
Maesono, Y., Edgeworth expansions of a studentized U-Statistic and a jackknife estimator of variance (1) 61– 84
Meeden, G., *see* K. He (1) 49– 59
Meier, U., On the asymptotic normality of rank tests for independence (2) 279–296
Miller, G.K. and U.N. Bhat, Estimation for renewal processes with unobservable gamma or Erlang interarrival times (2) 355–372
Mohan, N.R., *see* K.G. Janardan (2) 193–201
Muliere, P. and S. Walker, A Bayesian nonparametric approach to determining a maximum tolerated dose (2) 339–353
Pan, J., *see* M. Alvo (2) 219–248
Ragbi, B., Weak convergence of weighted multivariate empirical U-statistics processes under mixing condition (1) 1– 16
Shi, P., M-type regression splines involving time series (1) 17– 37
Sun, D., A note on noninformative priors for Weibull distributions (2) 319–338
Tiku, M.L., A note on a paper by N. Balakrishnan (2) 317–318
Vasudeva, R., *see* K.G. Janardan (2) 193–201
Walker, S., *see* P. Muliere (2) 339–353
Weissman, I., Fitting a Mejzler distribution to extreme value data (1) 39– 47
Wu, B., Kernel density estimation under weak dependence with sampled data (1) 141–154
Zou, G., Admissible estimation for finite population under the Linex loss function (2) 373–384
